

This is my sample resume. Different people can format and write things differently. Java and jhtml html. Css and etc. my phone can be +92 123 1234567 or +(92) - 223 1234567 And it can also be like 92 323 1234567 or 914231234567 or 523123456 with email.email1@email.com, email2@email.co.uk email_123@a.tk.

Javascript is a good language. So is python. My next phone is (042) _ 1234567.

I will add more variations but see these first.

This is v1 of document with emails, phones and skills words in it. Make sure you get all these in arrays with your algorithm.
